Introduction – What the database is about?

We created a database based of the Premier league in the 2022/23 season. This database is about organising information about player history, club cities, clubs, players and club owners. It has been designed to store and organise data in an organised manner, including player transfers from one club to another, club locations, manager and stadium information, player stats such as goals and assists and ownership details. Player stats, club information and ownership details are all easily found and managed thanks to this database, which also makes everything straightforward

Conceptual Design:

Entity Relationship Diagram/Logical Design

SQL Statements

The text which is highlighted in green represents the SQL statement where as the text highlighted in yellow represents the constraints

Club City Table:

```
--
-- Database: `Premier League Database 22/23`
--
--
-----

--
-- Table structure for table `clubCity1`
--

CREATE TABLE `clubCity1` (
  `clubID` int(11) NOT NULL DEFAULT 0,
  `clubName` varchar(100) NOT NULL,
  `cityName` varchar(100) NOT NULL,
  `cityRegion` varchar(100) NOT NULL
);

INSERT INTO `clubCity1` (`clubID`, `clubName`, `cityName`, `cityRegion`) VALUES

(21, 'Jonny Evans', 'Northern Ireland', 0, 0);

ALTER TABLE `players9`
ADD PRIMARY KEY (`player_id`);
COMMIT;
```

SQL Queries

Order by:

In the tables where club IDs are present, we typically inserted the data according to the sequence in which the ID numbers are found (e.g., the data for club ID 100 is in the first row, the data for club ID 200 is underneath, and so on). In this case, we arranged the data according to the year of founding by putting together the query in that order.

```
$queryclubOwner1 = "SELECT * FROM clubOwner1 ORDER BY yearOfFounding ASC";
```

Club Owner 1

Club ID	Name	Owner	Year of Founding
300	Manchester United	Joel Glazer	1878
100	Manchester City	Sheikh Mansour	1880
600	Tottenham Hotspur	Daniel Levy	1882
800	Leicester City	Aiyawatt Srivaddhanaprabha	1884
200	Arsenal	Stan Kroenke	1886
400	Newcastle United	Yasir Al-Rumayyan	1892
500	Liverpool FC	Tom Werner	1892
700	Chelsea	Todd Boehly	1905

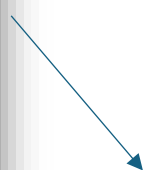

Limit:

The whole idea behind this table is to try to restrict the amount of records that are returned. Generally we have nine records. The ninth record, for Everton Fc, has the ID 900, the club city in Liverpool, and the city region is North West. We made the decision to restrict the number of records that are being displayed to 8, as the ninth record has no relation too the other databases.

```
$queryClubCity = "SELECT * FROM clubCity1 LIMIT 8";
```

Club Cities

Club ID	Name	City	Region
100	Manchester City	Manchester	North West
200	Arsenal	London	Greater London
300	Manchester United	Manchester	North West
400	Newcastle United	Newcastle Upon Tyne	North East
500	Liverpool FC	Liverpool	North West

JOIN and IN:

What we did here was merge 2 separate tables. One table which called “Club Owner 1”, holds information about who owns each club, while the other table “Club Cities” which contains information about the cities where each club is located. By combining these tables we created a new one that displays information from both tables, which has helped see connections between club ownerships and city locations.

```
$queryCombined = "SELECT cc.clubID, cc.clubName, cc.cityName, cc.cityRegion, co.clubOwner, co.yearOfFounding  
FROM clubCity1 AS cc  
INNER JOIN clubOwner1 AS co  
ON cc.clubID = co.clubID";
```

Club Cities

Club ID	Name	City	Region
100	Manchester City	Manchester	North West
200	Arsenal	London	Greater London
300	Manchester United	Manchester	North West
400	Newcastle United	Newcastle Upon Tyne	North East
500	Liverpool FC	Liverpool	North West
600	Tottenham Hotspur	London	Greater London
700	Chelsea	London	Greater London
800	Leicester city FC	Leicester	Midlands

Club Owner 1

Club ID	Name	Owner	Year of Founding
300	Manchester United	Joel Glazer	1878
100	Manchester City	Sheikh Mansour	1880
600	Tottenham Hotspur	Daniel Levy	1882
800	Leicester City	Aiyawatt Srivaddhanaprabha	1884
200	Arsenal	Stan Kroenke	1886
400	Newcastle United	Yasir Al-Rumayyan	1892
500	Liverpool FC	Tom Werner	1892
700	Chelsea	Todd Boehly	1905

Combined Club Owner and City Information

Name	Owner	Year of Founding	City	Region
Manchester City	Sheikh Mansour	1880	Manchester	North West
Arsenal	Stan Kroenke	1886	London	Greater London
Manchester United	Joel Glazer	1878	Manchester	North West
Newcastle United	Yasir Al-Rumayyan	1892	Newcastle Upon Tyne	North East
Liverpool FC	Tom Werner	1892	Liverpool	North West
Tottenham Hotspur	Daniel Levy	1882	London	Greater London
Chelsea	Todd Boehly	1905	London	Greater London
Leicester city FC	Aiyawatt Srivaddhanaprabha	1884	Leicester	Midlands

Count SUM and GROUP BY:

The Idea here is that we added an option where the user selects a value (nationality) from a drop down list and by selecting a certain value it filters through the players table to display the sum of the total players corresponding too the selected value alongside the sum of the total goals and assists corresponding to selected value

```
$queryFilteredPlayers = "SELECT player_nationality, COUNT(player_id) AS total_players, SUM(goals) AS total_goals, SUM(assists) AS total_assists
FROM Players9
WHERE player_nationality = '$nationality_filter'
GROUP BY player_nationality";
```

It's important note while the submit feature available for all the other tables, we choose to showcase it only for the player history table. It allows users to add new records, which are then displayed alongside existing ones.
